C.H.A.N.C.E. is a peer led recovery support center that uses non-clinical, peer-based activities that engages, educates and supports an individual to successfully make the life changes necessary to recover from mental health and or substance abuse disorder conditions.

C.H.A.N.C.E. engages with people at all levels of their recovery with mental health and substance abuse disorders.

We assist with the physical, mental and behavioral health and to promote individual, and group programs that foster health and resilience.

We hope to increase permanent housing, employment, education, and other necessary support networks and to reduce the barriers to social inclusion and stigma associated with mental health and addiction recovery.

A key to the success of our program is that each member of our staff, uses his or her own personal life experience of recovery as an example that recovery is not only achievable, but real and imperative.
